

## FASTEST METHOD TO INSULATE MASONRY.

The IP50D and IP40D are concrete pinner tools designed to attach insulation to a concrete or masonry substrate.

The IP40D is primarily designed for low-mid range PSI masonry applications.

The IP50D is primarily designed for mid-high range PSI masonry applications.

### PRODUCT FEATURES

- FAST! No pre-drilling necessary, just point and shoot.
- Rapidly attaches rigid insulation and mineral wool to concrete, masonry, and tilt up / precast walls
- Firing system uses lithium-ion battery with 165mm fuel cell

### IP50D

for mid-high range PSI masonry

### IP40D

for low-mid range PSI masonry

### THERMAL-GRIP® INSULATION PINS

- Anchor lengths available from 1" to 6" thickness
- Large 2.25" diameter washer head secures insulation
